

Together, the 11 CRCs serve caregiving families in every county in California. Each center offers services relevant to families in its local area in addition to a suite of core programs such as:

Caregiver Assessment

Let's see how we can help you

We offer standardized assessment tools to help us diagnose your caregiving needs and present you with the resources & services available to you.

Family Consultation & Care Navigation

For when you want advice

Our in-person or over-the-phone individual consultations connect you with our trained staff to provide ongoing emotional support, connect you with community resources, and shine a light on any creative care options that may apply to you.

Specialized Information

For when you have a question

Each of the CRCs offers personalized advice and community resources tailored to you and your loved one. We are also proud to offer CareNav™, our free online service that connects you with specialists and custom resources from the comfort of your home.

Respite Care

For when you need a break

We offer financial assistance for temporary fill-in caregivers (such as in-home support, adult day care services, short-term/weekend care, etc.) to help you with or give you a rest from care for an adult with a disabling condition.

Support Groups

For when you could use a friend

Caregiving can be isolating, but it's important to know that you're not alone. To help you connect with other caregivers who understand, we offer a Facebook group and monthly in-person or online meetings where caregivers come together to share experiences and exchange ideas.

Short-Term Counseling

For when you need to talk

You're under a lot of stress, which is why the CRCs all offer personal sessions with licensed counselors to provide emotional support and help with the emotional toll the caregiving role can take.

Caregiver Training

For when you need to learn a new skill

If you've ever felt overwhelmed or underprepared for your role, we can help. We offer customized classes for caregivers on a wide range of topics, like stress management, self-care, dementia, and more.

Legal & Financial Consultation

For long-term planning

We offer personal consultations with experienced elder law attorneys who are there to provide guidance on powers of attorney, estate and financial planning, conservatorships, and other complex, important matters.

Education

For your ongoing and ever-changing needs

We offer workshops for caregivers, community members, and professionals to help with topics such as day-to-day care, financial planning, future planning, personal well-being, and much more.

The Association of California Caregiver Resource Centers (ACCRC) represents the 11 regional nonprofit Caregiver Resource Centers (CRCs) that serve the estimated 5.5 million unpaid family and friend caregivers across the state. For more information, contact AssocCRCs@gmail.com.

Resources for families and caregivers of adults with chronic, disabling health conditions.

There is support wherever you are - you do not have to go on this caregiver journey alone.

Connect with your local Caregiver Resource Center today!

www.caregivercalifornia.org

Founded in 1984, the California Caregiver Resource Centers are a network of 11 centers throughout California which serve family caregivers who are providing support for someone affected by chronic and debilitating health conditions (such as heart disease, diabetes, COPD) and neurocognitive disorders also known as dementia (such as Alzheimer's disease, Parkinson's disease, Huntington's disease, Multiple Sclerosis, traumatic brain injury, stroke, aneurysms).

Caring for a loved one with a neurocognitive disorder (dementia) or another disabling condition forever changes the lives of families and caregivers. There can be devastating effects on those providing long-term care: financial pressures, legal quandaries, health problems, and emotional turmoil.

Fortunately, the California Caregiver Resource Centers offer support at **little to no cost** throughout the state, serving thousands of families and caregivers across income categories. Every California resident has access to a CRC in their area. The CRCs are united by shared values emphasizing choice, collaboration, innovation, quality, participation, respect & diversity.

For more information on the California Caregiver Resource Centers, visit:

www.caregivercalifornia.org

"I have benefited so much from the services the California CRCs have provided, especially the counseling and respite care. They gave me guidance and hope during very difficult times."
